MoodleNet 2.0 as a platform for sharing and curating OER

Dr Martin Dougiamas
Moodle CEO and Founder

The problem

When creating an online course in an LMS, educators generally start with a blank screen. They are left to create content from scratch, or search for their own content online.

While searching, you encounter three main problems:

1. There are a lot of OER repositories.
2. Searching these won’t tell you what’s good for your course.
3. Textbooks are great, but they don’t make for engaging courses.
4. Google etc don’t make it easy to “just find engaging OER”.

All of this takes a lot of time/effort away from educators.
How MoodleNet can solve this

MoodleNet provides a place for **curated collections** of the best content (OER and more) organised in ways that makes it easy to find collections that suit your course.

MoodleNet is integrated with your Moodle (and in future other LMSes) so it’s quick to add them directly to your course.

It is federated, flexible Open Education Technology that is not controlled by a single entity, subject to a single point of failure, and can work for all languages, sectors and contexts. You can run your own MoodleNet!

It can link to existing repositories, as well as accepting uploaded files.
MoodleNet 2.0 as a platform for sharing and curating OER

Key features of 2.0 redesign

- A new **User Experience**
- **Guests** can find and use resources
- **Validated People** have full access
- **Resources** can be tagged with ISCED **Subjects**, **Creative Commons Licenses** and other **Metadata**
- **Collections** of resources owned by one person
- Use **Bookmarks** and **Likes** on resources
- People can **Follow** collections, subjects and other people
- People can build their own **Profile**
- Sending resources directly to **Moodle**
Metadata

- **Subjects** (eg “Bachelor or equivalent”)
  - International Standard Classification of Education (2011)

- **Licenses** (eg “CC-0 Public Domain”)
  - Creative Commons

- **Type of resource** (eg “Lesson plan”)
  - MoodleNet custom (based on IEEE LOM, DCMI, etc)

- **Format** (eg “Video/animation”)
  - All MIME types

- **Language** (eg “English”)
  - ISO
Let’s take a look...
Welcome to MoodleNet

Our global network to share and curate open educational resources

Search for open educational content

Join our social network to share and curate open educational resources with educators world-wide.

Integrated with Moodle LMS and Moodle Workplace to make resources easy to find and use.

Build your profile as an educator.

Our global network to share and curate open educational resources.

MoodleNet settings

Enable MoodleNet integration

If enabled, a user with the capability to create and manage activities can browse MoodleNet via the activity chooser and import MoodleNet resources into their course. In addition, a user with the capability to restore backups can select a backup file on MoodleNet and restore it into Moodle.

MoodleNet instance name

The name of the MoodleNet instance available via the activity chooser.

MoodleNet URL

The URL of the MoodleNet instance available via the activity chooser.

Save changes
Where now?

- You can use the Beta version now at moodle.net for useful educational content

- Assuming you like it then, you can help in these ways:
  - Use moodle.net as a free service
  - Give feedback on any issues or add and vote for features you’d like to see on the MoodleNet Tracker
  - Get in touch if you’d like to help us with testing at the institutional level
  - Soon you can run a server yourself to extend the network
  - Help us find funding/devs to build the MoodleNet system
  - Help direct new and old OER projects get listed in MoodleNet
Thank you, and please get in touch!
