

Rebus

Supplemental Materials

Development Certificate

Explore, co-create, and implement supplemental materials rooted in learning science while reconnecting with the joy of teaching and learning.

Course Overview

Our **six-week certificate** course invites educators to create supplemental materials rooted in learning science while rekindling the joy of teaching.

Who it's for

Instructors, Instructional Designers, Librarians, and Support Professionals

Gain the **confidence** to **adapt, modify, and create** additional supplemental materials as educational needs evolve—whether for your classroom or to support others in their instructional roles.

You'll Create

Ready-to-implement resources such as:

- Interactive **self-checks** based on learning science
- Engaging in-class **activities** promoting active learning
- Authentic **assessments** for real-world application
- Supportive **resources** (slide decks, handouts, podcasts)

Blended Learning Experience

- 4 self-paced **modules**
- 3 optional **live sessions**
- Collaborative **feedback** environment from peers and course instructor
- Optional deep-dive activities on **AI**, instructional documents, and **deeper learning competencies**

Enrollment for **April** and **June** cohorts is now open.
