

Saber

Tecnologias Educacionais e Sociais

SABER EDUCATIONAL AND SOCIAL TECHNOLOGIES is a research group from the Federal University of Pernambuco (UFPE), a public university located in the Brazilian Northeast, which aims to support lifelong learning for all.

Our team is formed by a multidisciplinary collegiate, which involves teachers, researchers, students, and technical support personnel in the areas of Education, Information Technology, Design, Health, Information Science, Administration, among others.

SABER's resources come from national and international funding.

We coordinate the Open University of the Unified Health System (UNA-SUS) at UFPE, created by the Federal Government to support the permanent education of health workers from the Unified Health System.

“ Since 2012, we have developed and offered online courses, which have served more than **350,000** people from Brazil and other countries. ”

OUR INTERESTS

Planning, development, and offering of online courses.

Training of human resources to work on projects and courses that involve online teaching and learning processes (teachers, tutors, academic support).

Development and promotion of the use of open educational resources.

Partnership with national and international universities and research centers, to offer online courses and share open educational resources.

Digital inclusion in all age groups.

SABER VALUES AND CULTURE

Working at SABER involves a characteristic way of the Group. These are values that contribute to a culture about the way we work and what is important to us:

- Excellence: details matter and make a difference.
- Collaborative and humanized work and study expand as potentialities to create, learn, and teach.
- Interdependence, complementarity, and multidisciplinary.
- Respect and ethics.
- A compassionate look at the individual and collective needs.
- Compliance with rules and deadlines.
